Electrol 31

Electrical Contact Cleaner

ELECTROL 31 - is a clear water white liquid product designed for use as a special purpose electric motor cleaner and contact cleaner.

FEATURES

- Strong solvent cleaning - dissolves grease and oil instantly.
- Rapid evaporation - components dry in seconds.
- Completely non-flammable - no flash or fire points.
- Safe on most plastics and insulating varnishes.
- Leaves no residue on drying.

USES

ELECTROL 31 is an excellent cleaning solvent for the electrical industry. It can be used as a contact cleaner, electric motor cleaner or general degreasing solvent for parts and equipment.

ELECTROL 31 has many applications in the printing industry including machine and roller cleaning, blanket washing and silk screen cleaning.

ELECTROL 31 finds application anywhere a fast drying low toxicity solvent is required, eg. cleaning of business machines, typewriters, vending machines and most types of processing machines.

METHOD OF USE

ELECTROL 31 is always used in its concentrated form by means of swab, brush, spray or dip applications. When spraying, a coarse low pressure spray should be used. Do not atomise the product with higher pressure spraying.

When used in tank operations, the tank should be lidded when not in use to avoid excessive evaporation losses.

HANDLING

ELECTROL 31 will cause drying of the skin and rubber gloves and safety glasses should be worn. Avoid prolonged or repeated breathing of the vapours and do not smoke in the immediate area. Keep the product out of the reach of children.

PACKAGING

ELECTROL 31 - is packed in 23 litre and 205 litre drums.
