## TO WHOM IT MAY CONCERN

We have been using Tandex water treatment chemicals for some time now we treat our three water tube boiler producing about 80 – 90 tons of steam per hour. Having changed to Tandex products some of the benefits we have realised are loosening and removal of existing scaling, in fact presently only soft scale is remaining in a few areas; improved steam production; no deposition of any material on the turbine blades; the treatment programme is also more cost effective than the previous programmes we have had.

Regular testing and follow up by the local agent namely Astra Mercantile is much appreciated and genuine interest is shown in the boiler operations. A water treatment seminar was held at our Factory by Mr. Denis Buckley of Tandex Chemical, which was extremely informative to our staff.

We have no hesitation in recommending Tandex boiler treatment chemicals to any prospective user.

Thank you.

Yours faithfully,  
For NZOIA SUGAR COMPANY LTD.

MOHAMMED OMAR  
FACTORY MANAGER
